

## Get to the Poynt

### And Get to Know Sphere's Smart Terminal

The two-sided Poynt terminal is the latest addition to our payments arsenal. It is a sleek and secure payments terminal that accepts all forms of payments and delivers data and insights to your merchants.

### The Future on a Countertop

The Poynt Smart Terminal is a future-proof device that accepts magnetic stripe, EMV chip cards, NFC, Bluetooth and QR code payment technologies. Businesses can accept all favorite payment methods: Apple Pay, chip-and-pin, mobile apps, and whatever else the future brings.

Sphere was chosen as a launch partner to deliver this game changing terminal to the marketplace. No more flip flopping of terminals on the counter, no more EMV liability, and no more turning away ApplePay or other mobile wallets.

**Payments Without Boundaries!**
