

AT&T INTERNET SECURITY

WITH ActiveArmor™

24/7 advanced internet protection

for the smart devices connected to your Wi-Fi network.¹

RESTRICTED CONTENT

AT&T Internet Security **blocks access**^{2,3} from at-risk sites

Malicious sites try to install **malware**

Phishing sites try to **steal information**

AUTHORIZED PERSONNEL ONLY

Neighbors or lurkers may try to **connect without permission**

Hackers may try to **gain access** to your network

AT&T Internet Security has **built-in protection** for your whole Wi-Fi network against **unauthorized, external access** to your home network⁴

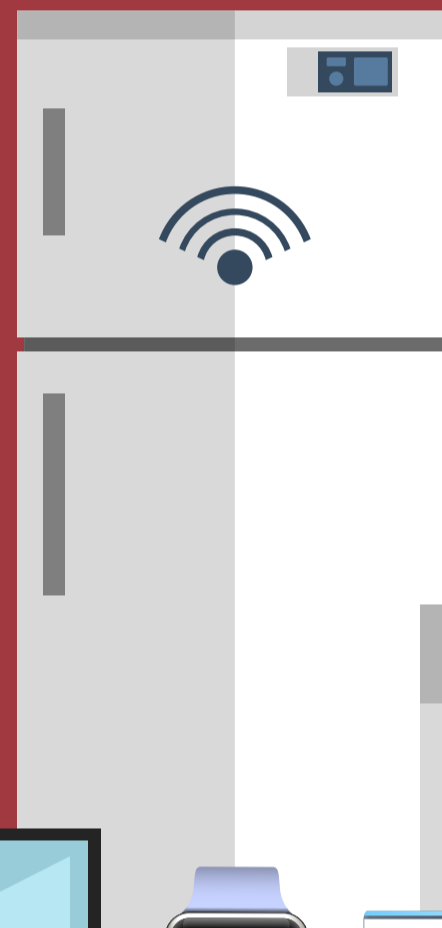

BEST BEHAVIOR

Smart devices may send suspicious data to **bad actors (hackers)**

AT&T Internet Security monitors device behavior 24/7 and **guards against suspicious activity**⁵

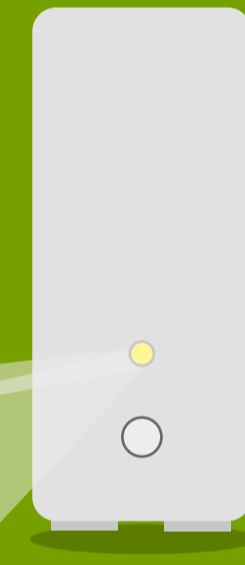

Computers may be used to **send spam** or **launch DDoS Attacks**

REGULAR INSPECTION

New devices or software updates may leave the network **vulnerable to exploitation**

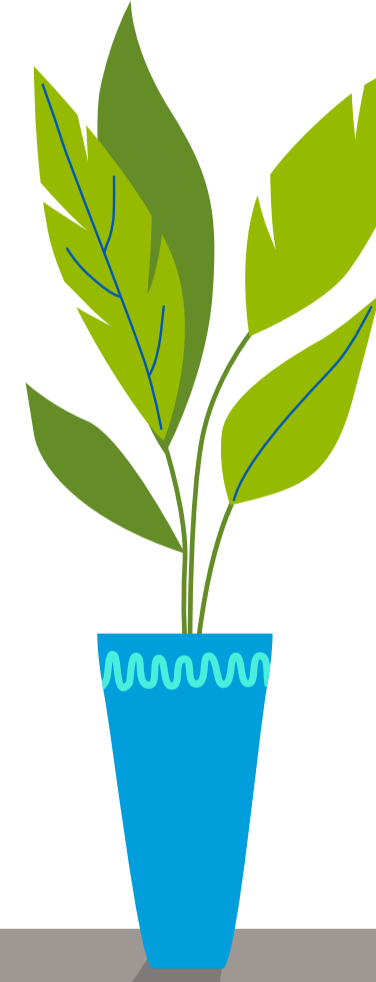

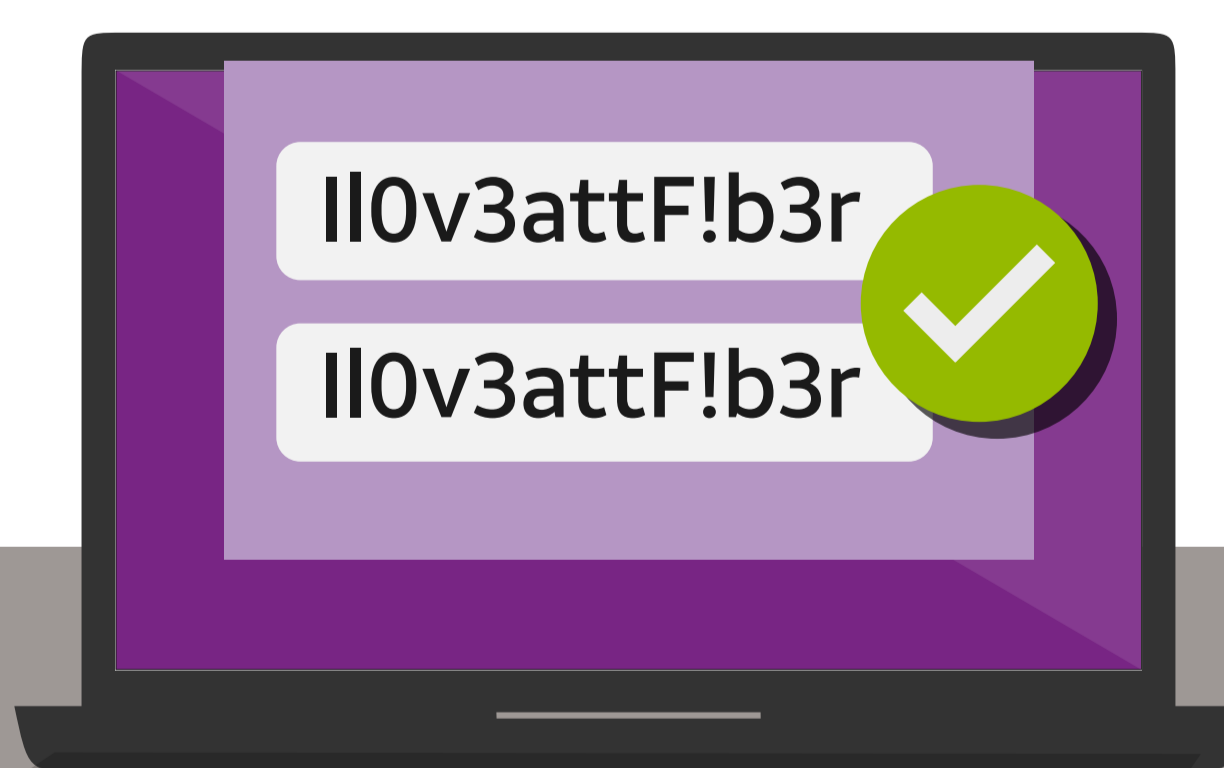

AT&T Internet Security **scans the network** to identify vulnerabilities and **alert users**

PASSWORD POWER-UP

Weak passwords are easy to guess and put accounts at risk

AT&T Internet Security **automatically scans devices and alerts you** if any passwords need to be changed

MANAGE AND SECURE YOUR SMART HOME WITH THE HELP OF AT&T SMART HOME MANAGER APP

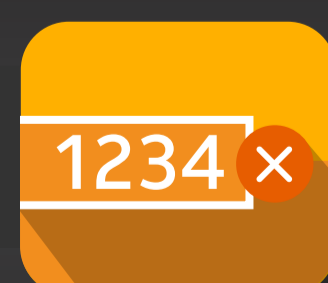

Blocks malicious sites & network intrusion

Detects suspicious behavior by device

Scans for vulnerabilities

Scans for and flags weak passwords

Set parental controls by user and time period⁶

Monitors bandwidth and data usage⁶

NOTES
